

A FREE GUIDE FOR GYM AND STUDIO OWNERS

The New Revenue Line Playbook

How gyms add a physician-led partnership without new staff, inventory or clinical work, and the questions to ask any health partner first.

Vitelize Health

01 · WHY NOW

A third way to grow, with no extra work.

Most gyms grow in two ways: more members, or more spend per member. Both cost the owner time, staff or capital. A medical partnership adds a third line that needs none of those, because the clinical work sits with the partner.

Your members are already asking your coaches where to get help with metabolic health, recovery and energy. When the answer is "somewhere else", that spend, and some of that trust, leaves your building.

02 · HOW IT WORKS

Your gym keeps the floor. We carry the medicine.

YOUR GYM	VITELIZE
Shares your partner page on your site, social and member portal	Builds and hosts the partner page, with both our names on it
Approves member communications; your system sends them	Drafts every communication; never touches your member list
Places QR codes and printed materials on the floor	Produces and ships every floor material at our cost
Team learns one sentence pointing members to the page	Licensed physicians and nurse practitioners evaluate, prescribe and monitor
Holds no inventory, licences or patient records	Holds the clinical record; licensed U.S. pharmacies fill each individual prescription
Earns a 20% net profit share	Pays the share monthly, tracked to your location

Vitelize does not white-label. The program is a partnership with your gym, under our Medical Director, Dr. Micah Craig, MD.

What it could be worth to your gym.

Members × share who enrol × net profit per member, monthly × 20% = your monthly revenue line

MEMBERS	ENROL	ENROLLED	NET PROFIT PER MEMBER / MONTH	TOTAL NET PROFIT / MONTH	YOUR 20% / MONTH	YOUR 20% / YEAR
300	2%	6	$245	$1,470	$294	$3,528
300	5%	15	$245	$3,675	$735	$8,820
300	10%	30	$245	$7,350	**$1,470**	**$17,640**

Illustration only, not a forecast. Net profit per member is a blended monthly figure: an equal mix of members on the LEAN program, a single weight-loss medication and a single peptide therapy, at list price, after pharmacy, shipping, clinical evaluation and card processing. Replace the inputs with your own member count. We confirm the profit share structure for your state during our due diligence; where a share isn't permitted, partners earn a licensing or marketing fee instead.

Your numbers

YOUR MEMBERS	SHARE WHO ENROL	NET PROFIT PER MEMBER / MONTH	YOUR 20% / MONTH
		$245	

04 · BEFORE YOU SIGN ANYTHING

Five questions to ask any health partner.

1. **Who prescribes, and who holds the clinical record?**
2. **Who sets the price and collects payment for the medication?**
3. **What does my staff have to say, and is any of it clinical?**
4. **Who touches my member list?**
5. **Whose name is on the program?**

If the answers make your gym the seller, the price-setter or the record-holder, you are becoming a clinic, not gaining a partner.

05 · WHAT YOUR STAFF SAYS

> **"If you're interested, our partner's physicians can evaluate you. Here's our page."**

One sentence, and nothing more. Your team never recommends a therapy, gives medical advice or handles an order.

06 · GOING LIVE

1. Sign one partnership agreement.
2. We build your partner page and track every order to your location.
3. Your QR codes and floor materials ship at our cost.
4. Your team learns the one sentence.
5. Members are evaluated by our clinicians; your share starts with the first order.

Partners go live in under a week.

07 · NEXT STEP

15 minutes to see if your location qualifies.

Book a short call with the Vitelize partnerships team. We confirm your state is eligible, walk through the partnership and answer your questions. No cost and no obligation.
